Dear Josh,

I am sorry indeed to hear that you and Ann Liederberg are going to leave us for pastures that you expect will be greener. I hope your expectations will be realized. We shall miss you.

I enjoyed your "Moon Dust"

article in Science. Your earlier suggestion
that we must have non-earth-contaminated
material from the first round trip
to the moon should be stressed
repeatedly even though that event will
not, in all probability, occur for some
years to come

Regretfully yours
Paul F C
